Kraków, 19-02-2013

Dear Sirs,

On behalf of the International Steering Committee we would like to invite you cordially to the international exhibition accompanying the **4th European Nanomanipulation Workshop** to be held in Krakow, **June 12 - 14, 2013**, at the Jagiellonian University Conference Centre *Auditorium Maximum*. As in the previous meetings (Cascais, Portugal, 2010; Tartu, Estonia, 2011; and Madrid, Spain, 2012) the main goal of the Workshop is to bring together scientists working in the field of controlled manipulation of atoms, clusters, and nanoscale objects by means of the scanning probe techniques and other related methods operating either in ultra high vacuum, ambient, or liquid environments. This includes basic techniques of manipulation, theoretical description of manipulation processes, as well as applications ranging from nano- and mesoscale friction to automatic assembly of nano-objects.

Since the exhibit will include research instruments, vacuum equipment, nanomaterials, as well as any other technologies and products relevant to the Conference topics, to best of our knowledge, the profile of your Company fits very well to the scope of the meeting. We believe that a close relationship between the producers and distributors of scientific equipment and the community of Workshop participants is of great importance for further development of nanotechnology and nanoscience in Europe. Therefore, your participation in the Exhibit/Workshop would be highly appreciated.

Companies interested in participating in the Workshop can choose from the following forms of participation:

- exhibition of scientific equipment in standard 6 m² booth, and/or display of brochures, books and other scientific papers, including distribution of marketing materials (participation fee of 1000 Euro);
- 15 minute oral presentation during a special technical session (participation fee of 200 Euro);
- distribution of marketing materials (attached to the conference materials distributed among the participants) for companies not attending the Workshop (fee of 150 Euro applies).

We would appreciate very much your kind consideration of our proposal and we are looking forward to hearing from you at your earliest convenience.

Yours sincerely,

Prof. Marek Szymonski, Ph.D.
Workshop Co-Chairman

Prof. Franciszek Krok, Ph.D.
Workshop Co-Chairman
